

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in YEA medium at 28°C for 24 h. The cell concentration was adjusted to 10⁸ cells/ml. The transformation efficiency was determined by the number of transformants per 10⁸ cells. The data are the mean ± SD of three independent experiments. * indicates a significant difference (p < 0.05) from the control.
